# Anti Foam

## Spray Solution Defoaming Agent

**Anti Foam works by reducing surface tension of the spray solution, which stops excessive foaming during mixing and agitation.**

### Key Benefits

- Stops foaming
- Helps to prevent contamination of outside of spray tank with spray solution
- Makes spray tank filling easier

*Where to use it?*

*When filling spray tanks if foaming occurs*

*What does it contain?*

*Anti-foaming agent*

### Application Guidelines

Use Anti Foam when it is necessary to reduce foaming in the spray tank.

This should be done when spray tank is at least half full and before foam overflows from tank.
